Due Date: 09/12/2022

Assignment 1: Intro

Part 1 (100 points): Describe your favorite WebGL demo.

My favorite demo is Umamiland (`https://umamiland.withgoogle.com/en`). The authors show very colorful 2D and 3D images of food. The colors are very bright and vibrant and the art style is very detailed. There are moving food and animal objects around and the transitions to each scene is very smooth and elegant. The project also highlights popular Japanese culture and cuisine and is education to those unfamiliar with it.

Technologies used:

- HTML/CSS/JavaScript

- Personal built WebGL framework

- Vue.JS

- Google App Engine

- GSAP animations

Bonus (33 points): If possible, try to host the project as your own Github repository and make it accessible via Github pages. Please make sure to credit the original authors. Then, link the repository here: `https://ADDLINK`
