Project-01
Name: Farhan Warsame
Due Date: 09/12/2022

Assignment 1: Intro

Part 1 (100 points): Describe your favorite WebGL demo.
This is a website that visualizes sports cars in 360 degrees. **It is called +360.** It has an option of changing the car models and the colors. You can also change the rim colors. It rotates around the car constantly.

My favorite demo is seeing my favorite hatchback in action, Audi S3.
You can take a look at it here: (`https://carvisualizer.plus360degrees.com/threejs/`).
The authors show few sports cars that someone can choose one from. I picked that Audi and customized it to colors that I like.

Technologies used:

- HTML/CSS/JavaScript

- Three.js or which framework?

  These are the only technologies use.

Bonus (33 points): THere is a link that will take to a page that I developed and linked to the webgl project. The project was built by +plus360.com `https://fhwarsam.github.io/Assignment_1_Demo.github.io/`
